-

TRAININGS

Python App Development

coding blocks (Noida)

Jun 2018 - Jul 2018

It was a certification course which had its main aim to teach us basics of Python as well as few libraries like PyQt5, Flask, Open-CV, BeautifulSoup etc. which enables us to create basic GUI apps for desktop/PC as well as micro web application.

PROJECTS

Ulavar

Mar 2019 - Mar 2019

Me along with my team "United" made this project as part of Smart India Hackathon'19.

Our project was made under ICAR, and our main problem statement demanded farming datasets to be visualised on the maps.

It also has few other features.

Travel Advisor

Jan 2019 - Jan 2019

It is a web app made to plan your vacation in a very convenient way.

Voice Assistant for Farmers

Oct 2018 - Oct 2018

This is a very basic desktop/ PC app, which is basically a voice assistant for farmers and it supports 5 languages; English, Hindi, Bengali, Telugu, Tamil. It is mainly to clarify farmers' doubts related to various common problems they face.

Battery Notifier ☐☐

Oct 2018 - Oct 2018

In Windows OS, we do get notification for low battery but often we forget to unplug our charger which might lead to deterioration of battery life. Thus, an app was created which lets you manually set the battery limit for both high and low yourself

Emergency Text Help

Aug 2018 - Sep 2018

This is an app created using Python that helps us to send text message to our close ones by clicking just one button along with our location link and you can also send your audio message converted into text message to your close ones
